Industrial Visit Report

Date: 09th Oct 2025

Venue: iGAP Technologies Private Limited, Kolhapur

1. Introduction

The industrial visit **to iGAP Technologies Private Limited**, located in Kolhapur, was conducted on **09th Oct 2025** as part of our academic curriculum. The purpose of this visit was to gain first-hand experience of industrial operations, understand the workflow, and learn about the practical applications of theoretical knowledge in a real-world industrial setting.

2. Objectives of the Visit

- To understand the working environment of an IT company.
- To learn about software development processes and project management.
- To explore the latest technologies used in the IT sector.
- To gain insights into career opportunities and industry expectations.

3. Company Overview

iGAP Technologies is a premier software development house dedicated to building scalable, secure, and high-performance digital solutions. We specialize in transforming complex business challenges into seamless software ecosystems, ranging from Custom ERPs and Web Applications to advanced AI and Data Science implementations.

4. Visit Schedule

- **Arrival and Welcome Session**: A brief introduction about the company, its mission, and vision.
- **Presentation on IT Trends**: Discussion on ERPs and Web Applications to advanced AI and Data Science implementations.
- **Software Development Process**: Overview of the software development lifecycle (SDLC) and agile methodologies.
- **Hands-on Demonstration**: Practical demonstration of coding and deployment of websites.
- **Interaction with Industry Experts**: Q&A session with experienced software developers and project managers.
- **Tour of the Facility**: Overview of different departments, including development, testing, and support.

- **Closing Session**: Feedback and appreciation ceremony.

5. Key Learnings

- Ability to build full-stack web applications.
- Skills to build AI-based systems, predictive models, and automation solutions.

Career opportunities in software development, IT consulting, and project management.

- Ability to analyze data and generate insights for decision-making.
- Understanding how real industry projects are managed and delivered.
- Ability to work effectively in team-based software development environments.
- Hands-on experience with real business software solutions.
