**Department of Computer Science & Engineering**  
**S. Y. B. Tech. Curriculum**  
**(Programme-Computer Science & Engineering) w. e. f. A.Y. 2025-2026**

<b>Course Title :- Discrete Mathematical Structures</b>	
<b>Course Code:- CSE24PCC211</b>	<b>Semester:- III</b>
<b>Teaching Scheme L-T-P : 3-0-0</b>	<b>Credits : 3</b>
<b>Evaluation Scheme: ISE-I (10 Marks), MSE (30 Marks), ISE-II(10 Marks)</b>	<b>ESE Marks: 50 marks</b>
<b>Prerequisite-</b>	AS24FE111-Algebra and Statistics DIC24FE121-Differential & Integral Calculus DS24FE124-Data Structure

**Course Objectives:**

1	To expose the students to mathematical logic related to computer science areas.
2	To enhance the problem solving skills in the areas of theoretical computer science.
3	To use mathematical concepts in the development of computer applications.

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

CO	Statements	BTL
1	Apply logic concepts in designing a program.	Apply
2	Illustrate basic set concepts & apply operations onset.	Understand
3	Apply logic to minimize the Boolean Function.	Apply
4	Apply basic concepts of probability to solve real world problem.	Apply
5	Demonstrate to represent data structures using graph concepts.	Apply

**Curriculum Details**

Course Contents	Duration
<b>Unit-I Mathematical Logic</b> <ul style="list-style-type: none"> <li>● Statements &amp; Notations,</li> <li>● Connectives,</li> <li>● Statement Formulas &amp; truth table,</li> <li>● Well-formed formulas,</li> <li>● Tautologies ,</li> <li>● Equivalence of formulas,</li> <li>● Duality law,</li> <li>● Tautological Implications,</li> <li>● Functionally complete set of connectives,</li> <li>● Other connectives,</li> <li>● Normal Forms,</li> <li>● Theory of Inference for statement calculus.</li> </ul>	<b>10 Hrs</b>
<b>Unit-II Set Theory</b> <ul style="list-style-type: none"> <li>● Basic concepts of set theory,</li> <li>● Operations on Sets,</li> <li>● Ordered pairs &amp; n-tuples,</li> <li>● Cartesian product</li> </ul>	<b>05 Hrs</b>

<b>Unit-III Relations &amp; Functions</b> <ul style="list-style-type: none"> <li>• Relations.</li> <li>• Properties of binary relations.</li> <li>• Matrix &amp; Graph Representation of Relation,</li> <li>• Partition &amp; covering of Set,</li> <li>• Equivalence Relations.</li> <li>• Composition of Binary Relation</li> <li>• POSET &amp; Hasse Diagram,</li> <li>• Functions,</li> <li>• Types of Functions,</li> <li>• Composition of functions.</li> </ul>	<b>07 Hrs</b>
<b>Unit-IV Algebraic Systems</b> <ul style="list-style-type: none"> <li>• Algebraic Systems: Examples &amp; general Properties,</li> <li>• Semi groups &amp; Monoids,</li> <li>• Groups: Definitions &amp; Examples,</li> <li>• Subgroup &amp; Homomorphism.</li> </ul>	<b>07 Hrs</b>
<b>Unit-V Lattice and Boolean Algebra</b> <ul style="list-style-type: none"> <li>• Lattice as partially ordered sets,</li> <li>• Lattice as Algebraic Systems.</li> <li>• Special Lattices</li> <li>• Boolean Algebra: Definitions &amp; examples,</li> <li>• Boolean Functions.</li> <li>• Representation &amp; Minimization of Boolean Functions.</li> </ul>	<b>08 Hrs</b>
<b>Unit-VI Graph Theory</b> <ul style="list-style-type: none"> <li>• Basic concepts of graph theory.,</li> <li>• Paths,</li> <li>• Reachability &amp; Connectedness,</li> <li>• Matrix,</li> <li>• Representations of Graphs.</li> <li>• Storage Representation &amp; Manipulations of Graphs.</li> <li>• PERT &amp; Related technologies.</li> </ul>	<b>06 Hrs</b>

**Course Articulation Matrix: Mapping of Course Outcomes (COs) with Program Outcomes (POs)**

(An Autonomous Institute)

**Department of Computer Science and Engineering**  
**S. Y. B. Tech. Curriculum**  
**(Programme-Computer Science & Engineering) w. e. f. A.Y. 2025-2026**

<b>Course Title :- Computer Networks</b>	
<b>Course Code:- CSE24PCC212</b>	<b>Semester:- III</b>
<b>Teaching Scheme L-T-P : 3-0-0</b>	<b>Credits : 3</b>
<b>Evaluation Scheme: ISE I (10 Marks), MSE (30 Marks), ISE II (10 Marks)</b>	<b>ESE Marks: 50 marks</b>
<b>Prerequisite-</b>	CNF24FE114- Computer and Network Fundamentals

**Course Objectives:**

<b>1</b>	To illustrate the TCP/IP protocol internal details
<b>2</b>	To explain and learn basic internet technology protocols & Transport layer protocol
<b>3</b>	To perceive IPv4, IPv6 addressing and protocol
<b>4</b>	To understand the Client server model & socket interface

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

<b>CO</b>	<b>Statements</b>	<b>BTL</b>
1	Demonstrate TCP protocol in detail.	Understand
2	Implement network and data link layer & transport layer.	Understand
3	Learn fundamentals of Application Layer protocols.	Understand
4	Apply the principals of socket programming in the networks.	Understand
5	Understand multimedia streaming and relevant protocols.	Understand

**Curriculum Details**

<b>Course Contents</b>	<b>Duration</b>
<b>Unit-I Introduction to Computer Network:</b> <ul style="list-style-type: none"> <li>TCP/IP protocol model, Difference Between OSI model &amp; TCP/IP Protocol suit</li> </ul> <b>Data Link Layer</b> <ul style="list-style-type: none"> <li>Data Link Layer Design issues for Data Link Layers,</li> <li>Framing methods, Error control: detection and correction, Flow control,</li> <li>Elementary Data Link protocols, Sliding window Protocols, Go back n, Selective repeat.</li> </ul> <b>Medium Access Control Sublayer:</b> <ul style="list-style-type: none"> <li>Static and Dynamic channel allocation, Multiple Access protocols ALHOA, CSMA, Collision Free Protocols</li> <li>Ethernet: IEEE 802.3, IEEE 802.4, IEEE 802.5 06 standards</li> <li>Wireless LANS 802.11 standards</li> </ul>	<b>8Hrs</b>

<p><b>Unit-II Network Layer:</b></p> <ul style="list-style-type: none"> <li>IPv4 Addresses: Classful Addressing Other Issues, Sub-netting and Super netting, Class less Addressing, Delivery</li> <li>Forwarding and routing; Routing methods: Shortest path, Link state, Distance vector routing and broadcast routing,</li> <li>Congestion control algorithms: Principles, Congestion prevention policies, congestion control in datagram subnet, Load Shedding, Jitter Control.</li> </ul>	<p><b>8 Hrs</b></p>
<p><b>Unit-III Internet Protocol:</b></p> <ul style="list-style-type: none"> <li><b>IPv4 Datagram format:</b> Fragmentation and reassembly models</li> <li>ARP, RARP, ICMP, IGMP</li> <li><b>Next Generation IPv6 and ICMPv6:</b> IPV6 addresses, packet format, ICMPv6, Transition from IPV4 to IPV6</li> </ul>	<p><b>5 Hrs</b></p>
<p><b>Unit-IV Transport Layer:</b></p> <ul style="list-style-type: none"> <li>Transport Layer: The Transport service primitives,</li> <li>UDP: Process to Process communication, User Datagram Format, Operation and uses of UDP.</li> <li>TCP: TCP Services and Features, TCP segment format, TCP Connections, Flow and error control in TCP, TCP Timers;</li> <li>Berkeley Sockets: The Socket Interface, Elementary Socket system calls byte ordering and address conversion routines, , The Client Server model and Software design, Concurrent processing in client-server software, Algorithms and issues in Client-Server design, Multiprotocol Servers, Multiservice Servers, Concurrency in clients, Unix Internet Super server (inetd).</li> </ul>	<p><b>8 Hrs</b></p>
<p><b>Unit-V Applications Layer Protocols:</b></p> <ul style="list-style-type: none"> <li><b>BOOTP, DHCP and Domain name system:</b> Name Space, Domain Name Space, Distribution of name space, and DNS in internet, Resolution, DNS messages, Types of records, Compression examples, and encapsulation. BOOTP, DHCP</li> <li><b>Remote Login: TELNET and File Transfer FTP, TFTP:</b> Concept, NVT, Embedding, Options &amp; options/sub-option negotiation, controlling the server, Out-of-band signalling, Escape character, Mode of operation, user interface. FTP: Connections, Communication, Command processing, File transfer, User interface, Anonymous FTP, TFTP.</li> <li><b>Web Applications Service Protocols: HTTP:</b> Architecture, Web Documents, HTTP Transaction, Request and Response, 7 HTTP Headers and Examples, Persistent Vs Non- Persistent HTTP, Proxy servers. Electronic Mail: Architecture, User agent, addresses, Delayed delivery, SMTP commands and responses, Mail transfer phases, MIME, POP3</li> </ul>	<p><b>10 Hrs</b></p>

**Unit-VI Multimedia In Internet:**

- Streaming stored audio/video
- Streaming live audio/video
- Real time interactive audio/video
- Real Time Transport Protocol (RTP)
- Real Time Transport Control Protocol (RTCP)
- Voice Over IP (VoIP),
- Session Initiation Protocol (SIP)

**6 Hrs**

**S. Y. B. Tech. Curriculum**  
**(Programme-Computer Science & Engineering) w. e. f. A.Y. 2025-2026**

<b>Course Code : CSE24PCC212P</b>	<b>Semester: III</b>
<b>Teaching Scheme: L-T-P: 0-0-2</b>	<b>Credit : 1</b>
<b>Evaluation Scheme: INT: 25 Marks</b>	<b>ESE/POE/OE Marks: -50</b>
<b>Prerequisite-</b>	CNF24FE114-Computer and Network Fundamentals

**Course Objectives:**

<b>1</b>	To illustrate the TCP/IP protocol internal details
<b>2</b>	To explain and learn basic internet technology protocols & Transport layer protocol
<b>3</b>	To perceive IPv4, IPv6 addressing and protocol
<b>4</b>	To understand the Client server model & socket interface

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

<b>CO</b>	<b>Statements</b>	<b>BTL</b>
1	Demonstrate TCP protocol in detail.	Understand
2	Implement network and data link layer & transport layer.	Understand
3	Learn fundamentals of Application Layer protocols.	Understand
4	Apply the principals of socket programming in the networks.	Apply
5	Understand multimedia streaming and relevant protocols.	Understand

**List of Experiments-**It should consist of 10-12 experiments based on the syllabus.

<b>Exp. No</b>	<b>Title of Experiments</b>	<b>Duration</b>
01	Study of following connectivity test tools with all its options-. ifconfig, arp, route, traceroute, nmap, netstat, finger	2 Hrs
02	Implementing Framing methods(Bit Stuffing/Byte stuffing/Character stuffing)	2 Hrs
03	Implementing Elementary data link protocol (Stop & wait protocol)	2 Hrs
04	Implementation of Error detection & correction code(CRC, Hamming)	2 Hrs
05	Programs to understand IP addressing, classful & classless addressing	2 Hrs
06	Implementation of sliding window protocol..	2 Hrs
07	Implement shortest path routing algorithm.	2 Hrs
08	Client program using UDP to connect to well known services (echo, time of the day service etc.).	2 Hrs
09	Implementing concurrent TCP multiservice client/server..	2 Hrs
10	Implementing Iterative UDP client/server.	2 Hrs
11	Configuration of basic services for FTP, HTTP, Telnet etc. on Linux Platform	2 Hrs
12	Capturing & Analyzing operation of various application layer protocols using network protocol analyzer. (Wireshark and tcpdump)	2 Hrs

**Course Articulation Matrix:** Mapping of Course Outcomes (Cos) with Program Outcomes (PO's)

<b>Course Title:-Computer Architecture &amp; Microprocessor Systems</b>	
<b>Course Code:- CSE24PCC213</b>	<b>Semester:-III</b>
<b>Teaching Scheme: L-T-P:2-0-0</b>	<b>Credits:2</b>
<b>Evaluation Scheme: ISE-I (15 Marks), ISE-II (15 Marks)</b>	<b>ESE Marks:50</b>
<b>Pre-requisite-</b>	CNF24FE114- Computer and Network Fundamentals

**Course Objectives:**

<b>1</b>	To understand the Architecture and Basic Programming model of 8085
<b>2</b>	To classify the instruction formats and various addressing modes of 8086 microprocessor
<b>3</b>	To make the students aware of overall design and architecture of computer and its organization
<b>4</b>	To understand the parallelism both in terms of single and multiple bus processors

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

CO	Statements	BTL
<b>1</b>	<b>Describe</b> the Architecture of 8085 microprocessor	Understand
<b>2</b>	<b>Classify</b> the 8086 Assembly Instructions set and use in Assembly language Programs	Understand
<b>3</b>	<b>Apply</b> the different algorithms to perform arithmetic operations	Apply
<b>4</b>	<b>Articulate</b> the design issues in the development of processor and pipelining for high performance Processor design	Understand

**Curriculum Details**

Course Contents	Duration
<b>UNIT-I 8085 Microprocessor Architecture &amp; Programming Techniques</b> <ul style="list-style-type: none"> <li>The 8085 Architecture,</li> <li>Opcodes fetch,</li> <li>Memory read and writes machine cycle.</li> <li>8085 instruction groups, addressing modes.</li> <li>Writing and execution assembly language program,</li> <li>Stack,</li> <li>Instruction related to stack execution of CALL and RET,</li> <li>The 8085 interrupt,</li> <li>RST instructions,</li> <li>vectored interrupts,</li> <li>RIM and SIM instructions</li> </ul>	<b>6Hrs</b>
<b>UNIT-II 8086 Microprocessor &amp; Assembly Language Programming</b> <ul style="list-style-type: none"> <li>The 8086 Processor Architecture,</li> <li>Register organization,</li> <li>Physical memory organization,</li> <li>Minimum and Maximum mode system and timings.</li> <li>8086 Instruction Set and Assembler Directives</li> <li>Machine language instruction formats,</li> <li>addressing modes,</li> <li>Instruction set of 8086,</li> </ul>	<b>8Hrs</b>

**(Programme- Computer Science& Engineering w.e.f.A.Y.2025-2026**

<ul style="list-style-type: none"> <li>• Programming with an assembler,</li> <li>• Assembly Language example programs.</li> <li>• Stack structure of 8086,</li> <li>• Interrupts and Interrupt service routines,</li> <li>• Interrupt cycle of 8086.</li> </ul>	
<b>UNIT-III Computer Arithmetic</b> <ul style="list-style-type: none"> <li>• Arithmetic Operations,</li> <li>• Binary Arithmetic,</li> <li>• Signed Numbers</li> <li>• Binary Numbers,</li> <li>• Decimal Arithmetic Operations,</li> <li>• Floating Point Arithmetic,</li> <li>• Floating Point Number Operations: IEEE 754 Floating Point Format,</li> <li>• General Multiplication,</li> <li>• Booth Multiplication,</li> <li>• Array Multiplier &amp; Division</li> </ul>	<b>6Hrs</b>
<b>UNIT-IV Processing Unit &amp; Pipelining</b> <ul style="list-style-type: none"> <li>• Fundamental Concepts,</li> <li>• Execution of complete Instruction,</li> <li>• Single &amp; Multiple bus organization,</li> <li>• Hardwired control &amp; Micro programmed Control,</li> <li>• Basic Concepts: Role of Cache Memory,</li> <li>• Pipeline Performance,</li> <li>• Data Hazards: Operand Forwarding</li> </ul>	<b>8Hrs</b>

<b>Course Title :- Fundamentals of Software Testing</b>	
<b>Course Code:- CSE24MDM214</b>	<b>Semester:- III</b>
<b>Teaching Scheme L-T-P : 2-0-0</b>	<b>Credits : 2</b>
<b>Evaluation Scheme: ISE-I (10 Marks), ISE-II (10 Marks)</b>	<b>ESE Marks: - 50 marks</b>
<b>Prerequisite</b>	PSCL24FE113- Problem Solving with C-Language

**Course Objectives:**

<b>1</b>	To expose the students to basic concepts and principles of software testing.
<b>2</b>	To make the students aware of the importance of testing strategies.
<b>3</b>	To expose the students to Software test plans and level.

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

<b>CO</b>	<b>Statements</b>	<b>BTL</b>
1	Understand systematic software testing importance.	Understand
2	Understand the software testing life cycle.	Understand
3	Describe the process of testing.	Understand
4	Understand the testing standards.	Understand

**Curriculum Details**

<b>Course Contents</b>	<b>Duration</b>
<b>Unit-I Introduction to Software Engineering and Software Testing</b> <ul style="list-style-type: none"> <li>Software Engineering and its importance,</li> <li>Software Process and Project,</li> <li>Component Software Processes,</li> <li>SDLC,</li> <li>Software Development Process Modules (Waterfall, Prototype, Spiral, V-model, RAD, Iterative),</li> <li>Project Management Process.</li> <li>Agile Development- XP, other Agile Process Models.</li> <li><b>Testing:-</b> Testing Process,</li> <li>Selection of Good Test Cases, and Measurement of Testing.</li> <li>Incremental Testing Approach,</li> <li>Basic Terminology Related to Software Testing.</li> <li>Testing Life Cycle (STLC),</li> <li>Principles of Testing,</li> <li>Limitations of Testing.</li> </ul>	<b>10 Hrs</b>

<b>Unit-II Software Verification and Validation</b> <ul style="list-style-type: none"> <li>Differences between Verification and Validation,</li> <li>Differences between QA And QC,</li> <li>V&amp;V Limitations,</li> <li>Categorizing V&amp;V Techniques,</li> <li>Role of V&amp;V in SDLC-Tabular Form (IEEE std. 1012),</li> <li>Software V&amp;V Planning (SVVP),</li> <li>Software Technical Reviews (STRS).</li> </ul>	<b>6Hrs</b>
<b>Unit-III Types of Testing and Levels of Testing</b> <ul style="list-style-type: none"> <li>Functional and Non-Functional Testing.</li> <li>Introduction, Unit, Integration, System, and Acceptance Testing Relationship, Integration Testing,</li> <li>Classification of Integration Testing,</li> <li>Decomposition-Based Integration,</li> <li>Call Graph-Based Integration,</li> <li>Path-Based Integration with its Pros and Cons.</li> </ul>	<b>7 Hrs</b>
<b>Unit-IV Specialized Testing Types, Software Testing Standards</b> <ul style="list-style-type: none"> <li>Regression Testing,</li> <li>Smoke Testing,</li> <li>Sanity Testing,</li> <li>Exploratory Testing and Ad-hoc Testing in Agile Development,</li> <li>Introduction to Agile Development and Agile Testing Quadrants.</li> <li>Introduction to Software Testing Standards,</li> <li>Key Software Testing Standards,</li> <li>Industry-Specific Testing Standards</li> </ul>	<b>7 Hrs</b>

<b>Sr No</b>	<b>Tutorial</b>	<b>Duarion</b>
1	<i>Comparison of Different SDLC Models</i> Compare <b>Waterfall, V-Model, Prototyping, and Evolutionary Models</b> using case studies.	1 Hr
2	<i>Agile vs. Traditional Models</i> <b>Compare</b> Agile (Scrum, Sprint) vs. Waterfall <b>in real-world scenarios.</b>	1 Hr
3	<i>Incremental &amp; RAD Model Implementation</i> <b>Case study on RAD (Rapid Application Development) for fast-paced projects.</b>	1 Hr
4	<i>Business Case &amp; Portfolio Management</i> <b>Develop a business case for a sample software project.</b>	1 Hr
5	<i>Estimation Techniques (Function Points, LOC)</i> <b>Calculate</b> effort, cost, duration <b>using basic estimation methods.</b>	1 Hr
6	<b>PERT/CPM Scheduling</b> Create a PERT chart and identify the critical path for a given project.	1 Hr
7	<b>Risk Identification &amp; Mitigation Strategies</b> Perform risk assessment for a software project using FMEA (Failure Mode Effect Analysis).	1 Hr
8	<b>ISO 9000 &amp; CMMI Compliance</b> Analyze how ISO 9000 & CMMI improve software quality. Mini-case study on project closeout & audit.	1 Hr

<b>Course Title :- Community Engagement Project</b>	
<b>Course Code:- CSE24CPE216P</b>	<b>Semester:- III</b>
<b>Teaching Scheme L-T-P : 0-0-4</b>	<b>Credits : 2</b>
<b>Evaluation Scheme: INT- 50 Marks</b>	<b>ESE Marks: -</b>
<b>Prerequisite-</b>	<b>-</b>

**Course Objectives:**

<b>1</b>	To promote awareness and utilization of government e-services among nearby communities.
<b>2</b>	To familiarize students to use computer science knowledge to solve real world problems of society.
<b>3</b>	To develop teamwork, communication, and presentation skills through group projects.

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

<b>CO</b>	<b>Statements</b>	<b>BTL</b>
1	Understand knowledge of various e-services provided by the Government of India to address common people issues.	Understand
2	Work effectively in groups while collecting data, preparing presentations and videos on the identified problem.	Analyze
3	Apply classroom knowledge to identify and solve the problems of people in nearby communities.	Analyze
4	Advocate for the adoption of government e-services and provide solutions to the real- world problem of the nearby people.	Analyze

**Curriculum Details**

<b>Course Contents</b>	<b>Duration</b>
<b>Week 1-2: Introduction to Community engagement projects and common people issues.</b> <ul style="list-style-type: none"> <li>Understanding the concept of community engagement projects.</li> <li>Identifying common problems in rural areas (e.g. healthcare, education, infrastructure)</li> <li>Case studies and discussions on successful community service initiatives.</li> </ul>	<b>8 Hrs</b>
<b>Week 3-4: Government E-Services Overview and identifying real world problems</b> <ul style="list-style-type: none"> <li>Introduction to government e-services in India and overview of digital platforms and portals (e.g., Digi locker, e-Gram Swaraj)</li> <li>Identifying and understanding the real-world issues (in nearby society) and performing brainstorming sessions to provide computer science knowledge to solve the same.</li> <li>Students can arrange visits to nearby places to do surveys by forming a group of minimum 4 to maximum 5 students.</li> </ul>	<b>8 Hrs</b>

<b>Course Title :- Applications of Data Structures</b>	
<b>Course Code:- CSE24VEC218P</b>	<b>Semester:- III</b>
<b>Teaching Scheme L-T-P : 0-0-4</b>	<b>Credits : 2</b>
<b>Evaluation Scheme: INT-25 Marks</b>	<b>POE: 25 Marks</b>
<b>Prerequisite-</b>	PSCL24FE113- Problem Solving with C-Language, DS24FE124- Data Structure

**Course Objectives:**

<b>1</b>	To demonstrate familiarity with major algorithms and data structures and analyze performance of algorithms.
<b>2</b>	To make a choice of appropriate data structure and algorithm design method for a specified application and determine which algorithm or data structure to use in different scenarios.
<b>3</b>	To write data structure programs using C programming language

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

<b>CO</b>	<b>Statements</b>	<b>BTL</b>
1	Implement various basic data structures and its operations.	Understand
2	Implement various sorting and searching algorithms.	Applying
3	Implement various tree operations.	Applying
4	Implement various graph algorithms.	Applying

**List of Experiments-**

<b>Exp. No</b>	<b>Title of Experiments</b>	<b>Duration</b>
01	Implement a <b>stack</b> (LIFO – Last In First Out) using a fixed-size array. It supports basic operations like <b>push</b> , <b>pop</b> , <b>peek</b> , and checks for overflow/underflow.	4 hrs
02	Implement a <b>singly linked list</b> with operations to insert nodes at the beginning, end, or a specific position, delete nodes, and display the list.	4 hrs
03	Implement a dynamic stack using a <b>linked list</b> where each node stores data and a pointer to the next node. Push and pop operations are performed at the head.	4 hrs
04	Implement a <b>queue</b> (FIFO – First In First Out) using arrays with operations like <b>enqueue</b> , <b>dequeue</b> , and checking front/rear elements, full or empty status.	4 hrs
05	A dynamic implementation of a queue using a <b>linked list</b> , supporting <b>enqueue</b> at the rear and <b>dequeue</b> from the front.	4 hrs
06	Implement a basic binary tree structure and supports traversal operations: <ul style="list-style-type: none"> <li>Inorder (LNR)</li> <li>Preorder (NLR)</li> <li>Postorder (LRN)</li> </ul> It shows the structure and hierarchy of tree-based data.	4 hrs

07	Implement a Binary Search Tree, where each node follows the rule: left < root < right. Supports insertion, searching, and deletion of nodes.	4 hrs
08	Implement a basic version of a <b>B+ Tree</b> , which is a type of balanced search tree	4 hrs
09	Demonstrate two searching techniques: <ul style="list-style-type: none"> <li>Linear Search: Traverses the array sequentially.</li> <li>Binary Search: Applies divide-and-conquer (sorted arrays only). Displays the number of comparisons made in each method.</li> </ul>	4 hrs
10	Implement two simple sorting algorithms: <ul style="list-style-type: none"> <li>Bubble Sort: Repeatedly swaps adjacent elements if they are in the wrong order.</li> <li>Selection Sort: Selects the smallest/largest element and places it in the correct position.</li> </ul>	4 hrs
11	Implement two efficient divide-and-conquer sorting algorithms: <ul style="list-style-type: none"> <li>Quick Sort: Uses a pivot to partition the array and recursively sorts the partitions.</li> <li>Merge Sort: Divides the array into halves, sorts each half, and merges them.</li> </ul>	4 hrs
12	Implement a graph using a sparse matrix format, which is a memory-efficient way to store graphs with many vertices but few edges.	4 hrs

**Course Articulation Matrix: Mapping of Course Outcomes (COs) with Program Outcomes (POs)**

FACULTY OF ENGINEERING & FACULTY OF MANAGEMENT,  
(An Autonomous Institute)

**Department of Computer Science & Engineering**  
**S. Y. B. Tech. Curriculum**  
(Programme-Computer Science & Engineering) w. e. f. A.Y. 2025-2026

<b>Course Title :- Automata Theory</b>	
<b>Course Code:- CSE24PCC221</b>	<b>Semester:- IV</b>
<b>Teaching Scheme L-T-P : 3-0-0</b>	<b>Credits : 3</b>
<b>Evaluation Scheme: ISE-I(10 Marks), MSE (30 Marks), ISE-II(10 Marks)</b>	<b>ESE Marks: 50 marks</b>
<b>Prerequisite-</b>	CSE24PCC211-Discrete Mathematical Structures

**Course Objectives:**

1	To introduce students to the mathematical foundations of computation, the theory of formal languages and grammars.
2	To strengthen the student's ability to understand and conduct mathematical proofs for Computations.
3	To make the students understand the use of automata theory in Compilers & System Programming.
4	To analyze and design finite automata, pushdown automata, grammars & Turing machines.

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

CO	Statements	BTL
1	Describe basic concepts of Regular Language and Regular Expressions.	Understand
2	Demonstrate to select appropriate abstract machine to recognize a given formal language.	Apply
3	Demonstrate to generate complex languages by applying Union, Intersection, Complement, Concatenation and Kleene * operations on simple languages.	Apply
4	Apply parsing concepts for syntax analysis.	Apply
5	Demonstrate to be familiar with thinking analytically and intuitively for problem solving situations in related areas of theory in computer science.	Apply

**Curriculum Details**

Course Contents	Duration
<b>Unit-I Regular Languages and Finite Automata</b> <ul style="list-style-type: none"><li>• Proofs,</li><li>• Recursive Definitions,</li><li>• Regular expressions and regular languages,</li><li>• Finite Automata,</li><li>• Unions, intersection &amp; complements of regular languages, replications of FA</li></ul>	<b>08 Hrs</b>
<b>Unit-II Nondeterminism and Kleene's Theorem</b> <ul style="list-style-type: none"><li>• Nondeterministic finite automata,</li><li>• NFA with null transition,</li><li>• Equivalence of FA's,</li><li>• Kleene's Theorem (Part I &amp; Part II),</li><li>• Minimal Finite Automata</li></ul>	<b>07 Hrs</b>

<b>Course Title :- Software Engineering</b>	
<b>Course Code:- CSE24PCC223</b>	<b>Semester:- IV</b>
<b>Teaching Scheme L-T-P: 3-0-0</b>	<b>Credits : 3</b>
<b>Evaluation Scheme: MSE (30)</b>	<b>ESE Marks: 50 marks</b>
<b>Prerequisite-</b>	PSCL24FE113- Problem Solving with C-Language

**Course Objectives:**

<b>1</b>	To learn and understand basic concepts and principles of software engineering.
<b>2</b>	To make the students aware of the importance of SDLC in their project development.
<b>3</b>	To apply the project management and analysis principles to software project Development.
<b>4</b>	To apply design and testing principles to software project development

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

<b>CO</b>	<b>Statements</b>	<b>BTL</b>
1	Understand systematic methodologies of SDLC.	Understand
2	State SRS for their problem domain.	Remember
3	Use UML for Object Oriented Modelling.	Apply
4	Understand testing methods and importance of software maintenance.	Understand

**Curriculum Details**

<b>Course Contents</b>	<b>Duration</b>
<b>Unit-I :- Introduction to Software Engineering</b> <ul style="list-style-type: none"> <li>Software Engineering Fundamentals: Introduction to software and software engineering,</li> <li>Software Processes,</li> <li>Software Development Process Models-waterfall model, incremental model, spiral model,</li> <li>Agile Development- XP, other Agile Process</li> </ul>	<b>6 Hrs</b>
<b>Unit II: Software Requirements Analysis</b> <ul style="list-style-type: none"> <li>Introduction to Requirements Engineering.</li> <li>Value of a good SRS, Requirements Process, Requirements Specifications,</li> <li>Other Approaches for Analysis,</li> <li>Validation.</li> <li>Case study on Software requirements.</li> </ul>	<b>5 Hrs</b>

**Department of Second Year Engineering**

<b>Course Title :- Computer Graphics and Multimedia</b>	
<b>Course Code:- CSE24MDM225</b>	<b>Semester:- IV</b>
<b>Teaching Scheme L-T-P : 2-0-0</b>	<b>Credits : 2</b>
<b>Evaluation Scheme: ISE-I (10 Marks), ISE-II (10 Marks)</b>	<b>ESE Marks: 30 Marks</b>
<b>Prerequisite-</b>	AS24FE111- Linear Algebra, PSCL24FE113-Problem Solving with C

**Course Objectives:**

<b>1</b>	To introduce the fundamental concepts of computer graphics and multimedia.
<b>2</b>	To provide exposure to basic graphics techniques and multimedia applications.
<b>3</b>	To enable students to create simple multimedia content using available tools.

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

<b>CO</b>	<b>Statements</b>	<b>BTL</b>
1	Understand the basic concepts and applications of computer graphics and multimedia in real-world scenarios.	Understanding
2	Identify and describe the working of basic graphic elements, coordinate systems, and transformations in 2D graphics.	Understanding
3	Describe how basic drawing and animation techniques are used to create simple visual elements using graphics tools or platforms.	Understanding
4	Explain common multimedia components (text, audio, video, images) and their formats, and describe basic compression and editing techniques.	Understanding

**Curriculum Details**

<b>Course Contents</b>	<b>Duration</b>
<b>Unit-I Basic of Computer Graphics</b> <ul style="list-style-type: none"> <li>What is computer graphics? Real-life applications (games, movies, education, UI design).</li> <li>Types of graphics: 2D vs 3D, static vs dynamic, raster vs vector.</li> <li>Display devices overview: Monitors, LCD, OLED – how images appear on screen.</li> <li>Pixels, resolution, and color models (RGB, CMYK)</li> </ul>	<b>8 Hrs</b>
<b>Unit-II Drawing and Animation Concepts –</b> <ul style="list-style-type: none"> <li>Introduction to coordinates (X, Y) and grids.</li> <li>Idea of transformations: Transformation (moving), Scaling (resizing), Rotation (turning) shapes</li> <li>Basic animation concepts: Frames, motion, and timeline.</li> <li>Introduction to drawing tools like Scratch or Pygame</li> </ul>	<b>8 Hrs</b>

<b>Unit-III Multimedia Concepts and Tools</b> <ul style="list-style-type: none"> <li>Introduction to Multimedia: Definitions, Components (Text, Image, Audio, Video, Animation)</li> <li>File formats: JPEG, PNG, MP3, WAV, MP4, GIF</li> <li>Compression Techniques: Lossy vs. Lossless (JPEG, MPEG, Huffman coding basics)</li> <li>Authoring tools: Adobe Photoshop, Audacity, OpenShot, Flash (historical context)</li> </ul>	<b>7 Hrs</b>
<b>Unit-IV Interactive Graphics and Animation</b> <ul style="list-style-type: none"> <li>Basic animation principles (keyframing, tweening, frame rate)</li> <li>Introduction to 3D graphics: Perspective projection basics</li> <li>Event handling and GUI programming in graphics (basic input/output)</li> </ul>	<b>7 Hrs</b>

<b>Course Title: Environmental Studies</b>	
<b>Course Code: CSE24VEC226</b>	<b>Semester: IV</b>
<b>Teaching Scheme: L-T-P: 2-0-0</b>	<b>Credits: 2</b>
<b>Evaluation Scheme:-ISE- I(10 Marks), ISE-II (10 Marks) INT-30</b>	<b>ESE : -</b>
<b>Prerequisite:</b>	This course is imparting fundamental knowledge and awareness of Environmental Studies among students and importance of conservation of environment.

**Course Objectives:**

1.	Study scope and importance of natural resources, ecosystems, biodiversity for creating awareness and their conservation in multiple disciplines.
2.	Learn various types of pollution, their impacts and control measures for minimizing pollution and sustainable development.
3	Understand social issues related to the environment, environmental ethics and human rights towards the environment.
4.	Study various laws and regulations related to environment and its applicability in society and industries.

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

CO	Statements	BTL
1	Summarize natural resources, importance of ecosystem and conservation of biodiversity with respect to multiple disciplines	Apply
2	Explain causes, effects, solutions for various pollution problems and its minimization strategies.	Apply
3	Interpret environmental ethics and their implementation for betterment of environment and human life.	Apply
4	Outline the requirements of laws and regulations for environmental conservation and applicability of legislations in society and industries.	Apply

<b>Course Title :-Technologies used for Project Management and Start-Up</b>	
<b>Course Code:-CS24-228</b>	<b>Semester:- IV</b>
<b>Teaching Scheme L-T-P :1-0-0</b>	<b>Credits : 1</b>
<b>Evaluation Scheme: ISE- I (10 Marks), ISE- II (15 Marks), INT- 25 Marks</b>	<b>ESE: -</b>
<b>Prerequisite-</b>	<b>-</b>

**Course Objectives:**

<b>1</b>	To understand project management fundamentals, including lifecycles and stakeholder roles.
<b>2</b>	To learn planning techniques and communication strategies for successful projects.
<b>3</b>	To explore the start-up ecosystem, including key players, growth stages, and challenges.
<b>4</b>	To develop skills in building and pitching start-up ideas using project management and entrepreneurial tools.

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

<b>CO</b>	<b>Statements</b>	<b>BTL</b>
1	Understand and explain project management and startup fundamentals.	Understand
2	Apply WBS, SMART goals & gantt chart in project planning.	Apply
3	Analyze resource management strategies and communication effectively.	Analysing
4	Analyze the startup landscape, including key players, growth stages, challenges, and opportunities.	Analysing
5	Create and present innovative startup ideas with project plans, MVPs, and pitch decks using entrepreneurial tools	Create

**Curriculum Details**

<b>Course Contents</b>	<b>Duration</b>
<p><b>Unit 1: Project Management Fundamentals and Planning &amp; Scheduling and Resource Management &amp; Communication</b></p> <ul style="list-style-type: none"> <li>Understanding Projects: Definition,</li> <li>Lifecycle (Initiation, Planning, Execution, Monitoring &amp; Control, Closure).</li> <li>Project Stakeholders: Roles and Responsibilities (Project Manager, Team Members, Clients).</li> <li>Importance of Project Management: Benefits across Engineering Disciplines,</li> <li>Importance in Different Industries.</li> <li>Project Management Methodologies: Traditional vs. Agile Project Management Approaches.</li> <li>Introduction to Project Management Software: Exploring features of popular project management tools (e.g., Asana, Trello, etc.).</li> </ul> <p><b>Project Planning Techniques:</b></p> <ul style="list-style-type: none"> <li>Work Breakdown Structure (WBS) for Task Breakdown.</li> <li>Setting SMART Goals: Specific, Measurable, Achievable, Relevant, Time-bound.</li> <li>Project Scheduling: Introduction to Gantt Charts and Dependency Management.</li> <li>Project Management Software: Using Features for Planning and Scheduling.</li> </ul>	<b>8 Hrs</b>

Course Contents	Duration
<ul style="list-style-type: none"> <li>Resource Management: Identifying and Allocating Human &amp; Material Resources.</li> <li>Effective Communication: Strategies for Clear &amp; Timely Updates to Stakeholders.</li> <li>Communication Tools: Utilizing Features within Project Management Software.</li> </ul>	
<b>Unit-II The Start-up Ecosystem, Developing a Start-up, Putting It Into Practice</b> <ul style="list-style-type: none"> <li>Minimum Viable Product (MVP): Building Basic Version for Initial Validation.</li> <li>Lean Start-up Methodology: Build-Measure-Learn Cycle for Continuous Improvement.</li> <li>Crafting a Start-up Pitch: Identifying Key Elements and Storytelling Techniques.</li> <li>Presenting Your Start-up Idea: Developing a Pitch Deck using Design Tools.</li> <li>Start-up Landscape: Key Players (Entrepreneurs, Investors, Accelerators).</li> <li>Start-up Growth Stages: Ideation, Validation, Scaling, Challenges &amp; Opportunities for Start-ups.</li> <li>Technology for Start-ups: Online Tools for Market Research, Competitor Analysis, Customer Discovery, and Surveys.</li> <li>Introduction to the Business Model Canvas as a tool for visualizing and refining start up ideas.</li> <li>Develop a project management plan for a simulated engineering project (scope, schedule, resources);</li> <li>Present your plan and receive feedback (optional; include Budget considerations).</li> <li><b>Develop a Start-up Idea &amp; Pitch:</b> Identify a problem (engineering or general) and propose a 2 solution (your start up idea): Build (Optional): Create a basic Minimum Viable Product (MVP) prototype (online tools/basic coding); Pitch: Present your start up idea focusing on the problem, solution, and target market.</li> </ul>	<b>7Hrs</b>

<b>Course Title: Technologies used for Project Management and Start-Up</b>	
<b>Course Code : CS24-228L</b>	<b>Semester: I</b>
<b>Teaching Scheme: L-T-P: 0-0-2</b>	<b>Credit : 1</b>
<b>Evaluation Scheme: INT: 25 Marks</b>	<b>ESE/POE/OE Marks: -</b>
<b>Prior Knowledge of:</b>	<b>No Prerequisite Required.</b>

**Course Objectives:**

1.	To understand project management fundamentals, including lifecycles and stakeholder roles.
2.	To learn planning techniques and communication strategies for successful projects.
3.	To explore the start-up ecosystem, including key players, growth stages, and challenges.
4.	To develop skills in building and pitching start-up ideas using project management and entrepreneurial tools.

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

CO	Statements	BTL
1	Understand and explain project management and startup fundamentals by effectively applying WBS, SMART goals & gantt chart in project planning.	Understand
2	Analyze resource management strategies and communication effectively.	Analyze
3	Analyze the startup landscape, including key players, growth stages, challenges, and opportunities.	Analyze
4	Create and present innovative startup ideas with project plans, MVPs, and pitch decks using entrepreneurial tools	Create

**List of Experiments-**

Exp. No	Title of Experiments	Duration
01	<b>Project Life Cycle Simulation (Lab 1):</b> Simulate a project lifecycle using a board game or online tool. Players take on roles (project manager, team members, client) and experience the different phases (Initiation, planning, execution, monitoring & control, closure),	2 Hrs
02	<b>Stakeholder Identification &amp; Responsibilities (Lab 2):</b> Choose a real-world project (eg, campus event, building renovation) and identify key stakeholders. Analyze their roles, responsibilities, and communication needs.	2 Hrs
03	<b>Work Breakdown Structure (WBS) Creation (Lab 3):</b> Select a common engineering task (eg, designing a bridge, building a robot), Break down the task into a hierarchical WBS using project management	2 Hrs

Exp. No	Title of Experiments	Duration
	software. (eg. Asana, Trello) or a mind map tool.	
04	<b>SMART Goal Setting &amp; Scheduling (Lab 4):</b> Define SMART goals for a personal or academic project. Use project management software to create a schedule with tasks, deadlines, & dependencies using Gantt charts.	2 Hrs
05	<b>Resource Allocation &amp; Management (Lab 5):</b> Simulate a resource allocation scenario. Students are assigned limited resources (eg. materials, budget) and tasked with completing project tasks within those constraints, Analyze trade-offs and resource conflicts.	2 Hrs
06	<b>Communication Plan Development (Lab 6):</b> Develop a communication plan for a hypothetical engineering project, Identify stakeholders, communication channels (meetings, emails), and communication frequency	2 Hrs
07	<b>Startup Ecosystem Research (Lab 7):</b> Research a specific industry and identify key players (entrepreneurs, investors, accelerators) relevant to startups in that field.	2 Hrs
08	<b>Business Model Canvas Workshop (Lab 8):</b> Conduct a workshop where students learn about and practice using the Business Model Canvas to explore potential startup ideas.	2 Hrs
09	<b>Minimum Viable Product (MVP) Prototyping (Lab 9):</b> Students choose their startup ideas (developed in Unit 6) and create a basic MVP prototype using online tools or basic coding (optional).	2 Hrs
10	<b>Pitch Deck Creation (Lab 10):</b> Using design tools and presentation software, students develop a pitch deck for their startup ideas, highlighting the problem, solution, target market, and team.	2 Hrs

**Unit 4:--- Networking, Multithreading and Database:**

- Networking: Overview of Networking,
- Networking Basics,
- Working with URLs,
- Creating a URL,
- Parsing a URL,
- Reading Directly from a URL,
- Connecting to a URL,
- Reading from and Writing to a URL Connection,
- Sockets,
- Reading from and Writing to a Socket,
- Writing the Server Side of a Socket,
- Datagrams,
- Writing a Datagram Client and Server.
- Multithreading: Processes and Threads,
- Runnable Interface and Thread Class ,
- Thread Objects,
- Defining and Starting a Thread,
- Pausing Execution with Sleep,
- Interrupts,
- Thread States,
- Thread Properties,
- Joins,
- Synchronization.
- Database Programming: The Design of JDBC, The Structured Query

<b>Course Title: Java Programming Lab</b>	
<b>Course Code : CSE24VSEC228P</b>	<b>Semester: IV</b>
<b>Teaching Scheme: L-T-P: 0-0-2</b>	<b>Credit : 1</b>
<b>Evaluation Scheme: INT (25 Marks)</b>	<b>POE: 50 Marks</b>
<b>Prerequisite:</b>	PSD24FE125- Object Oriented Programming Skill Development

**Course Objectives:**

<b>1</b>	To explain fundamental and object oriented concepts of Java.
<b>2</b>	To distinguish OOP concepts implementation in Java compared to C++.
<b>3</b>	To expose students to advanced features in Java.
<b>4</b>	To develop console applications using Java such as chatting server, student management system etc.

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

<b>CO</b>	<b>Statements</b>	<b>BTL</b>
1	Use knowledge of fundamental and OOP concepts for programming.	Apply
2	Apply knowledge of advanced features in Java.	Apply
3	Apply knowledge of various concepts of computer science and design solutions for different subjects like threading, networking, and database.	Apply
4	Develop simple applications. Example: (Student's basic profile.)	Apply

**List of Experiments-**

<b>Exp. No</b>	<b>Title of Experiments</b>	<b>Duration</b>
01	Develop a Java Program to implement class and create its objects.	2 Hrs
02	Create Separate Engine, Tyre and Door Class. Create a Car class as parent class of these classes. And show functionality of each component in the car.	2 Hrs
03	Developing Java program with interface inheritance.	2 Hrs
04	Develop a mathematical package for Statistical operations like Mean, Median, Average, Standard deviation. Create a sub package in the math package-convert. In "convert" package provide classes to convert decimal to octal, binary, hex and vice-versa. Develop application program to use this package, and build executable jar file of it.	2 Hrs

**Department of Computer Science & Engineering**  
**S. Y. B. Tech. Curriculum**  
**(Programme-Computer Science & Engineering) w. e. f. A.Y. 2025-2026**

05	Develop a class Expr to create and evaluate given expression. Constructor accepts the expression as String. For example, Expr("x^2") or Expr("sin(x)+3*x"). If the parameter in the constructor call does not represent a legal expression, then the constructor throws an IllegalArgumentException. The message in the exception describes the error. Provide eval(double num) and eval(int num) method to evaluate given expression and return evaluated answer. For example, if Expr represents the expression 3*x+1, then func. value(5) is 3*5+1, or 16. Finally, get Definition() returns the definition of the expression. This is just the string that was used in the constructor that created the expression object.	2 Hrs
06	Write a class to represent Roman numerals. The class should have two constructors. One constructs a Roman numeral from a string such as "XVII" or "MCMXCV". It should throw a NumberFormatException if the string is not a legal Roman numeral. The other constructor constructs a Roman numeral from an int. It should throw a NumberFormatException if the int is outside the range 1 to 3999. In addition, the class should have two instance methods. The method to String() returns the string that represents the Roman numeral. The method toInt() returns the value of the Roman numeral as an int.	2 Hrs
07	Take file name as input to your program, If file exists then open and display contents of the file. After displaying contents of file ask user – do you want to add the data at the end of file. If a user gives yes as response, then accept data from user and append it to file. If file does not exist then create a fresh new file and store user data in to it. User should type exit on new line to stop the program.	2 Hrs
08	Take Student information such as name, age, weight, height, city, phone from user and store it in the file using DataOutputStream and FileOutputStream and Retrieve data using DataInputStream and FileInputStream and display the result.	2 Hrs
09	Write a program to implement Chatting Program.	2 Hrs
10	Write a Console based program to create a student registration and Login. Store Registration data in file and take Login information from file.	2 Hrs

<b>Course Title :- Mini Project using S/W Engineering Lifecycle</b>	
<b>Course Code:- CS24-223L</b>	<b>Semester:- IV</b>
<b>Teaching Scheme L-T-P : 0-0-4</b>	<b>Credits : 2</b>
<b>Evaluation Scheme: INT(50 Marks)</b>	<b>POE: 50 Marks</b>
<b>Prerequisite-</b>	PSCL24FE113- Problem Solving with C-Language, DS24FE124- Data Structure PSD24FE125- Object Oriented Programming

**Course Objectives:**

<b>1</b>	To formulate the problem statement.
<b>2</b>	To follow the SDLC model for development of project.
<b>3</b>	To develop the logical skills and use of appropriate data structures for solving the engineering problems.

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

<b>CO</b>	<b>Statements</b>	<b>BTL</b>
1	Define appropriate problem statements for real world problems.	Remembering
2	Organize an effective project plan with clear objectives and prepare a synopsis.	Analyzing
3	Design the various modules of the project to provide a solution to the problem with the help of various design tools.	Evaluating
4	Develop the proposed system using suitable development platform.	Creating

**Curriculum Details:**

<b>Course Contents</b>
<ul style="list-style-type: none"> <li>The Project should be undertaken preferably by a group of 3-4 students who will jointly work and implement the project.</li> <li>The group will select a project with the approval from the domain expert panel and submit the name of the project with a synopsis.</li> <li>The Project should consist of defining the problem and analyzing it, designing the solution and implementing it using a suitable programming language.</li> <li>A presentation and demonstration based on the above work is to be given by the group for ISE. The work will be jointly assessed twice in a semester by an internal domain expert panel. A hard copy of the project report of the work done is to be submitted along with the softcopy of the project during ESE. The problems can be referred from the web links concerned with ACM-ICPC.</li> </ul> <p><b>Project topics may be selected from following :</b></p> <ul style="list-style-type: none"> <li>Real world applications</li> <li>Probability and Statistics</li> </ul>

<b>Course Title :- Fundamentals of Cyber security</b>	
<b>Course Code:- CSE24HC2212</b>	<b>Semester:- IV</b>
<b>Teaching Scheme L-T-P : 3-0-0</b>	<b>Credits : 3</b>
<b>Evaluation Scheme Evaluation Scheme: ISE-I (10 Marks), MSE (30 Marks), ISE-II (10 Marks)</b>	<b>ESE Marks: 50 marks</b>
<b>Prerequisite-</b>	<b>CNF24FE114-Computer and Network Fundamentals</b>

**Course Objectives:**

CO	Statement
1	To understand the basic concepts of cyber-Security.
2	To study different attacks in cyber-crimes.
3	To understand different tools and methods used in cyber-crime.
4	To study cyber security challenges and implications.
5	To know about Cyber Security Organizational Issues, Policies.

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

CO	Statements	BTL
1	Understand basic concepts of Cyber Crimes.	Understand
2	Identify the attacks in Cyber Crimes	Apply
3	Able to specify the suitable methods used in Cyber Crime	Understand
4	Ability to face cyber security challenges	Understand
5	Understand Cyber Security	Understand

**Curriculum Details**

Course Contents	Duration
<b>UNIT I-Introduction to Cyber Security:</b> <ul style="list-style-type: none"> <li>Basic Cyber Security Concepts, layers of security, Vulnerability, threat, Harmful acts,</li> <li>Internet Governance – Challenges and Constraints, Computer Criminals,</li> <li>CIA Triad, Assets and Threat, motive of attackers, active attacks, passive attacks,</li> <li>Software attacks, hardware attacks, Spectrum of attacks, Taxonomy of various attacks,</li> <li>IP spoofing, Methods of defence, Security Models, risk management,</li> <li>Cyber Threats-Cyber Warfare,</li> <li>Cyber Crime, Cyber terrorism, Cyber Espionage, etc.</li> <li>Comprehensive Cyber Security Policy</li> </ul>	<b>8Hrs</b>
<b>UNIT II-Cyber Offenses:</b> <ul style="list-style-type: none"> <li>How Criminals Plan Them: Introduction,</li> <li>How Criminals plan the Attacks</li> <li>Social Engineering</li> <li>Cyber stalking</li> <li>Cyber cafe and Cybercrimes</li> <li>Botnets: The Fuel for Cybercrime</li> <li>Attack Vector</li> <li>Cloud Computing</li> </ul>	<b>8 Hrs</b>

<b>Course Title: Fundamentals of Cyber security</b>	
<b>Course Code : CSE24HC2212P</b>	<b>Semester: V</b>
<b>Teaching Scheme: L-T-P: 0-0-2</b>	<b>Credit : 1</b>
<b>Evaluation Scheme: INT: 25 Marks</b>	<b>POE/OE: -</b>
<b>Prior Knowledge of:</b>	Fundamentals of Cyber security

**Course Objectives:**

CO	Statement
1	To understand the basic concepts of cyber-Security.
2	To study different attacks in cyber-crimes.
3	To understand different tools and methods used in cyber-crime.
4	To study cyber security challenges and implications.
5	To know about Cyber Security Organizational Issues, Policies.

**Course Outcomes (COs):** After successful completion of the course, students will be able to:

CO	Statements	BTL
1	Understand basic concepts of Cyber Crimes.	Understand
2	Identify the attacks in Cyber Crimes	Apply
3	Able to specify the suitable methods used in Cyber Crime	Understand
4	Ability to face cyber security challenges	Understand
5	Understand Cyber Security	Understand

**List of Experiments-**It should consist of 10-12 experiments based on the syllabus.

Exp. No	Title of Experiments	Duration
01	Study of concept of layered security	2 Hrs
02	Analyze a case study of a breached organization focusing on Confidentiality, Integrity, and Availability (CIA).	
03	Set up network monitoring tools (e.g., Wireshark) to capture traffic and analyze for anomalies or potential attacks.	2 Hrs
04	Use a vulnerability scanner (like Nessus/OpenVAS) to analyze a sample network. Report on discovered vulnerabilities and threats.	2 Hrs
05	Case Study: The Twitter Bitcoin Scam (2020)	2 Hrs
06	Case Study: The Use of Cyber Cafés in Identity Theft	2 Hrs
07	Case Study: Evaluate different security models (e.g., Bell-LaPadula, Biba, Clark-Wilson) on a case study scenario. Discuss the pros and cons of each model.	2 Hrs
08	Demonstrate how keyloggers capture keystrokes and methods to detect them.	2 Hrs
09	Develop a simple virus or worm that replicates and spreads across a local network	2 Hrs
10	Develop a simple C program with a buffer overflow vulnerability	2 Hrs
11	Conduct a case study on a high-profile internet governance issue, like net neutrality or data privacy laws in different countries.	2 Hrs
